DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of: producing a memory cell having a transistor and a capacitor in an integrated circuit, the improvement which comprises:

initially providing a whole-area polysilicon layer;

covering the polysilicon layer with an oxidation protection layer;

structuring the oxidation protection layer by photolithography to produce a mask covering a gate region and a field region of the transistor by etching the oxidation protection layer and uncovering the polysilicon in unmasked regions, causing the oxidation protection layer remaining over the field region to form a dielectric and the underlying polysilicon to form a first electrode of the capacitor;

converting the polysilicon of the polysilicon layer in regions freed from the oxidation protection layer into silicon dioxide by local oxidation and thereby structuring the polysilicon layer;

applying a further polysilicon layer with an inclusion of a remaining oxidation protection layer;

applying and structuring a photoresist mask to cover a region of the further polysilicon layer disposed above the field region for forming a second electrode of the capacitor; and

Art Unit: 2812

producing the second electrode of the capacitor by etching the further polysilicon layer in the unmasked regions, as required by claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
